Nama : Muhammad Bintang Gunawan

1. Instruksi Tugas

Menambahkan fitur Show, Update, dan Destroy pada tabel Genre dan Author, menangani validasi ketika data tidak ditemukan, serta mengubah routing API menggunakan Route::apiResource().

2. Implementasi

a. Routing API

Route untuk Genre dan Author saya buat dengan Route::apiResource(). Route untuk Book tidak saya ubah, tetap seperti sebelumnya.

b. Controller Genre

GenreController punya lima method, yaitu index(), store(), show(), update(), dan destroy().

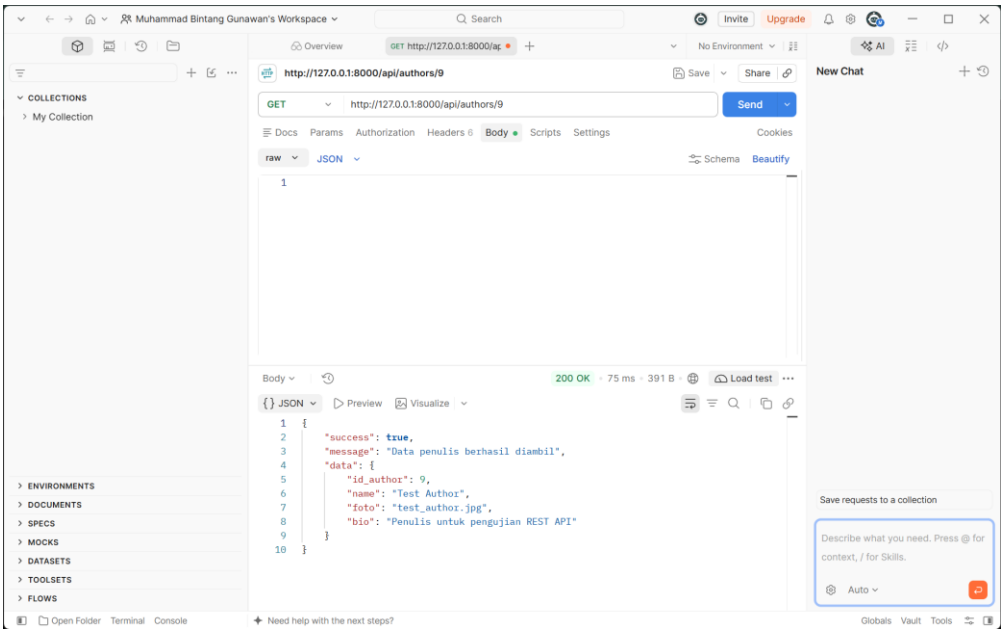

c. Controller Author

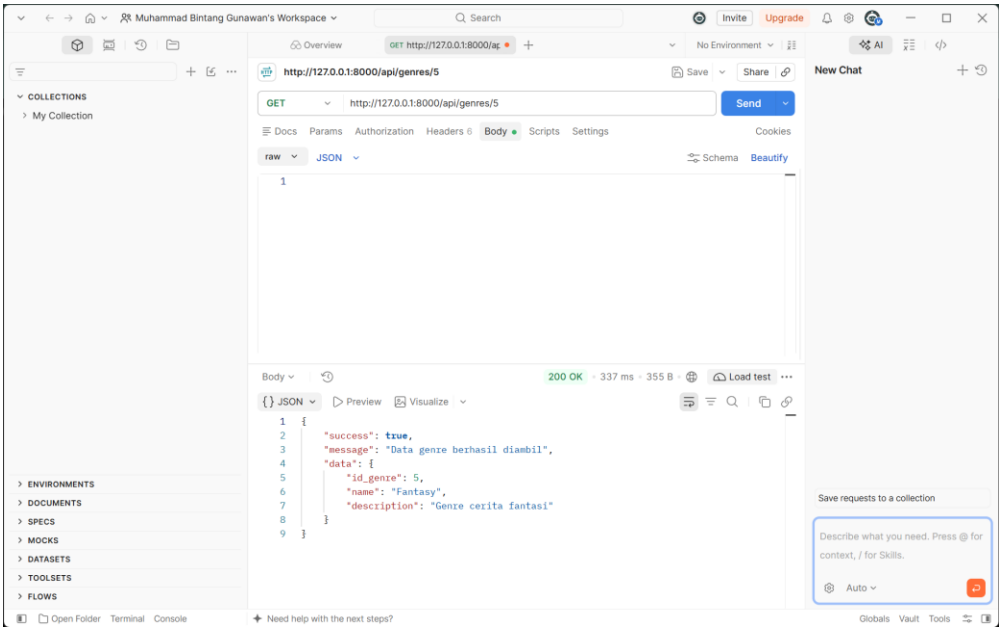

AuthorController juga punya lima method yang sama: index(), store(), show(), update(), dan destroy().

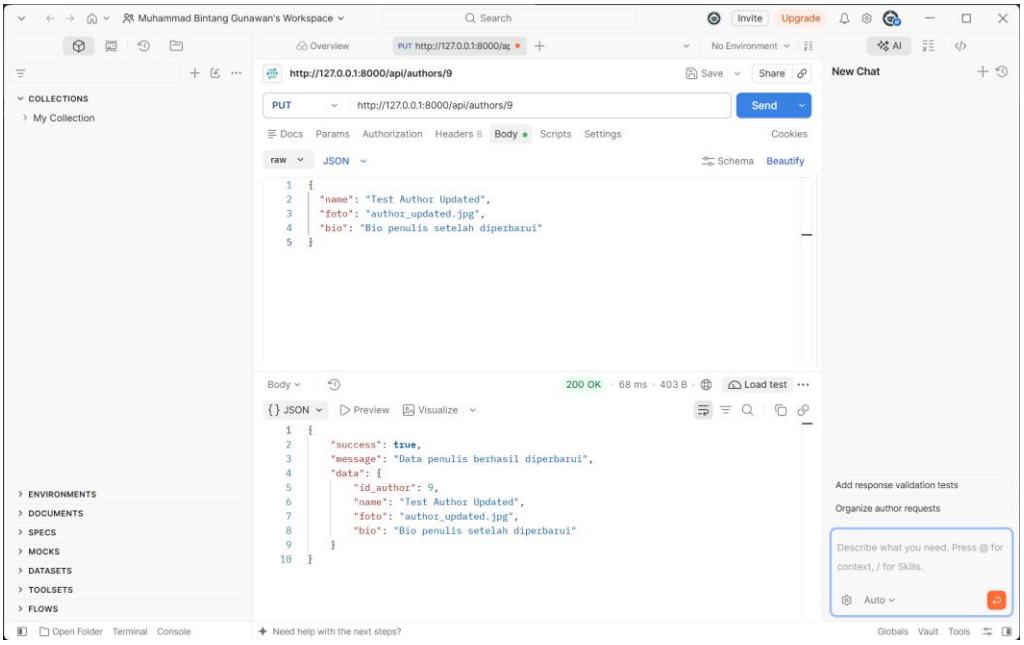

d. Validasi Data

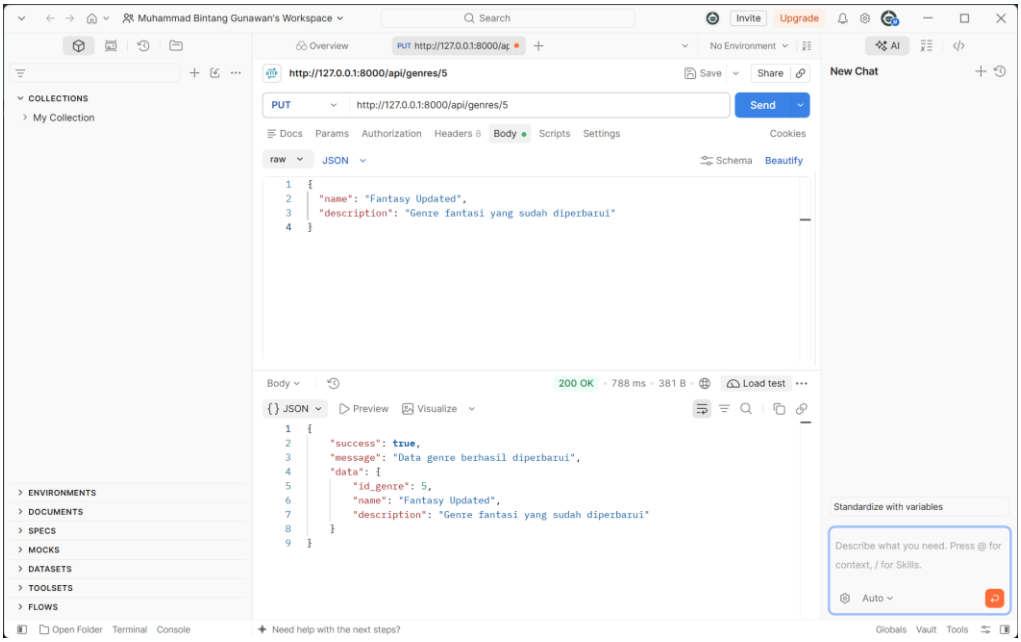

Sebelum memproses data, controller mengecek dulu apakah datanya ada berdasarkan ID. Kalau tidak ketemu, API mengembalikan status HTTP 404 Not Found beserta pesan yang sesuai.

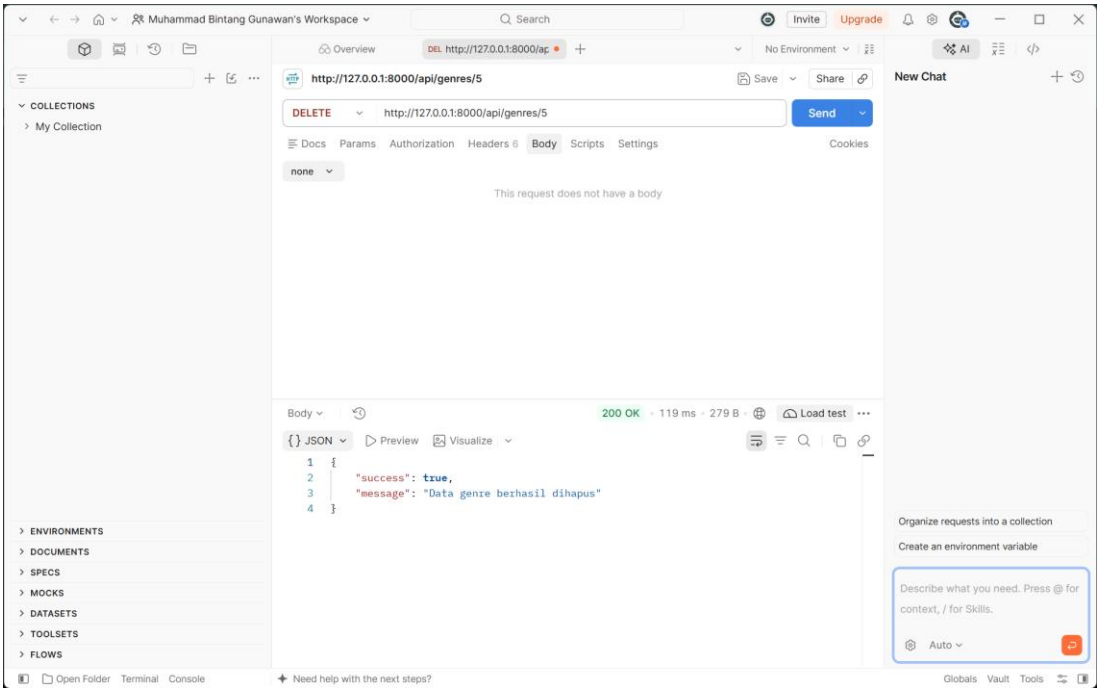

3. Hasil Pengujian Postman
