Nama : Muhammad Bintang Gunawan

1. Intruksi Tugas

Menerapkan konsep middleware pada aplikasi Booksales API menggunakan framework Laravel.

1. Read All dan Show pada Author dan Genre, dapat diakses untuk semua orang, bahkan yang belum melakukan autentikasi.
2. Create, Update, dan Destroy hanya dapat diakses oleh admin.

2. Implementasi Middleware

2.1 AdminMiddleware

Middleware ini saya buat di file:
app/Http/Middleware/AdminMiddleware.php

Ada dua hal yang dicek oleh middleware ini:

- Apakah pengguna sudah terautentikasi.
- Apakah role pengguna adalah admin.

Kalau pengguna belum terautentikasi, API mengembalikan HTTP 401 Unauthorized. Kalau sudah login tapi bukan admin, API mengembalikan HTTP 403 Forbidden.

2.2 Registrasi Middleware

Alias middleware admin saya daftarkan di:
bootstrap/app.php

Dengan begitu, middleware bisa dipakai di routing API lewat alias admin.

2.3 Pengaturan Routing

Pengaturan routing saya tulis di:
routes/api.php

Pembagian aksesnya begini:

- GET untuk Author dan Genre bisa diakses oleh siapa saja (publik).
- POST, PUT, PATCH, dan DELETE untuk Author dan Genre hanya bisa diakses oleh pengguna yang sudah terautentikasi lewat Sanctum dan punya role admin.

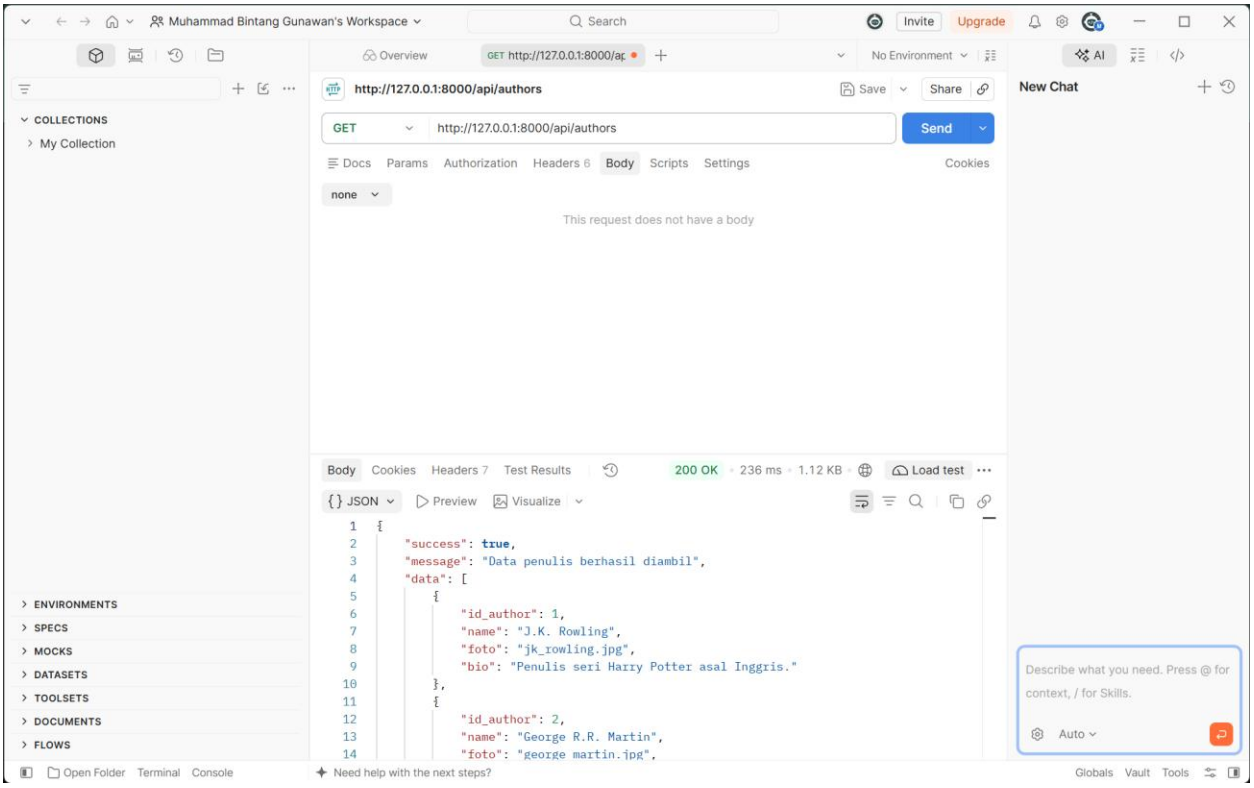

2.4 Role Pengguna

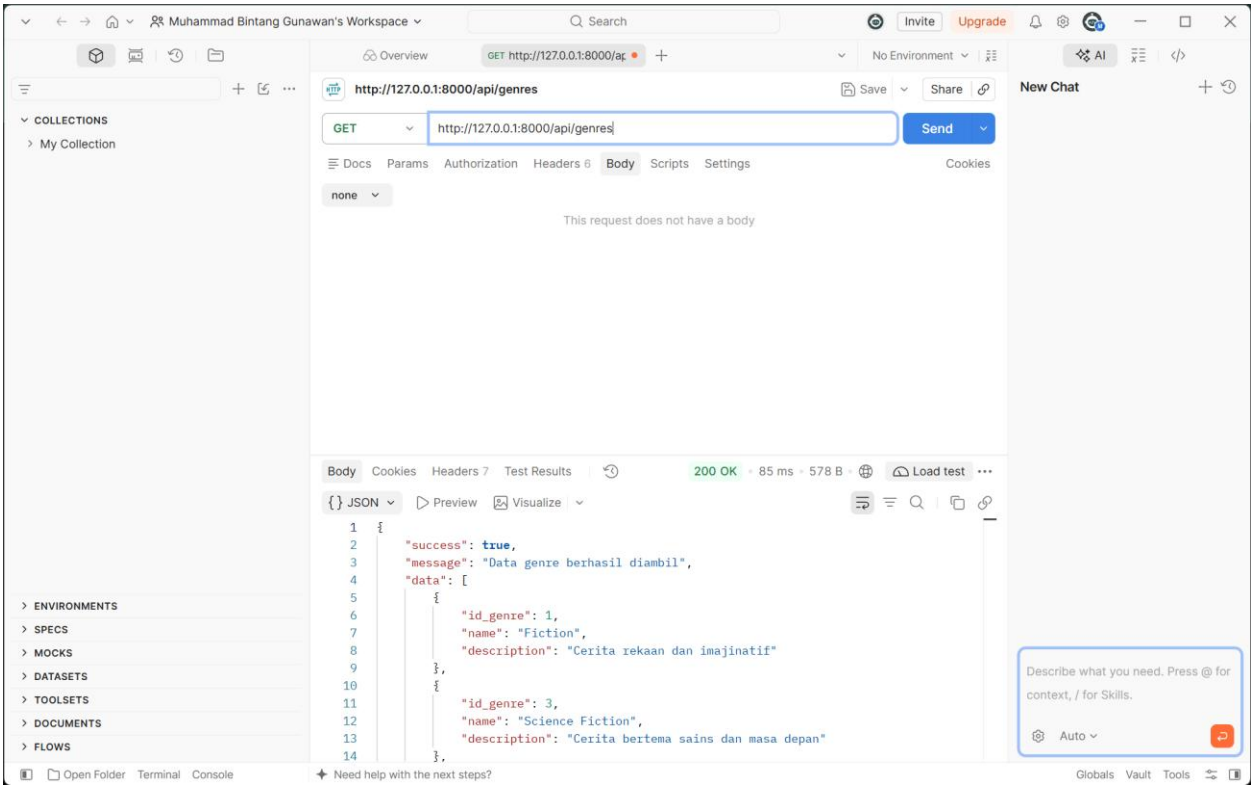

Kolom role saya tambahkan ke tabel users lewat migration. Ada dua role:

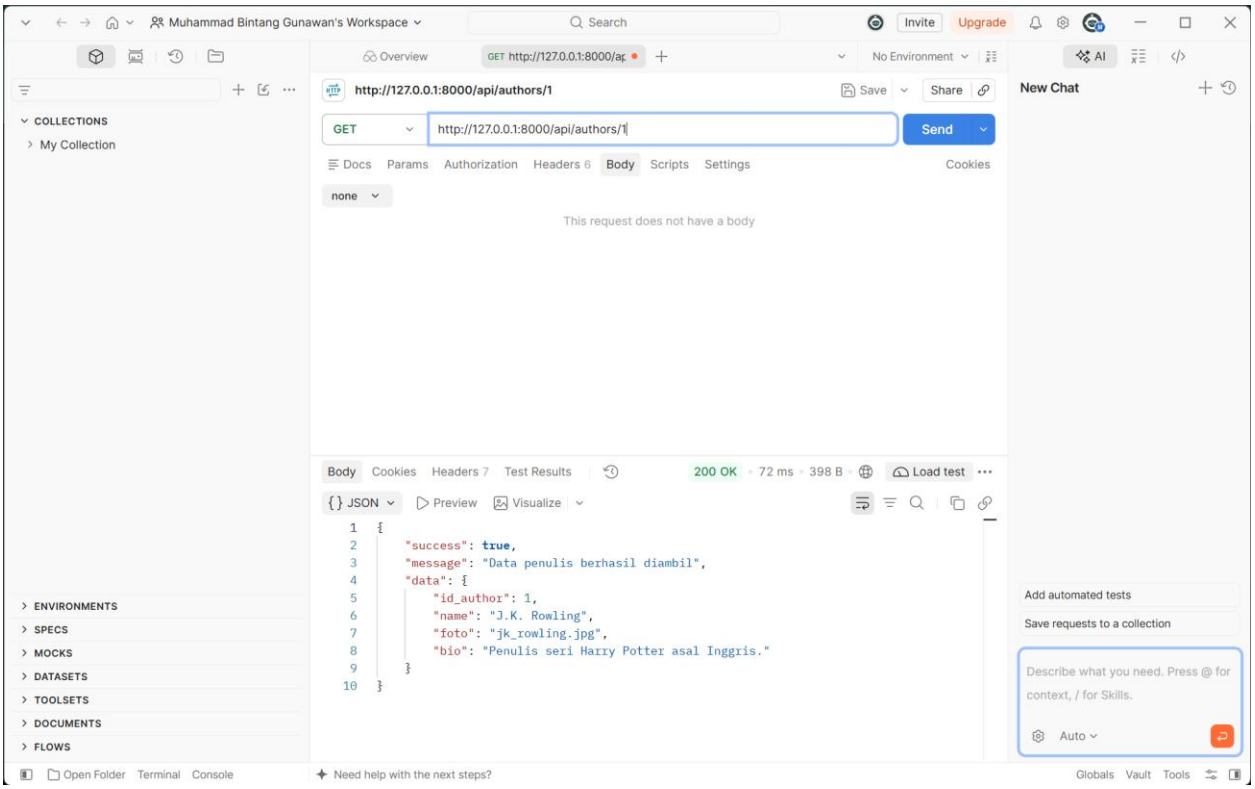

- user: pengguna biasa.
- admin: administrator yang boleh mengelola data.

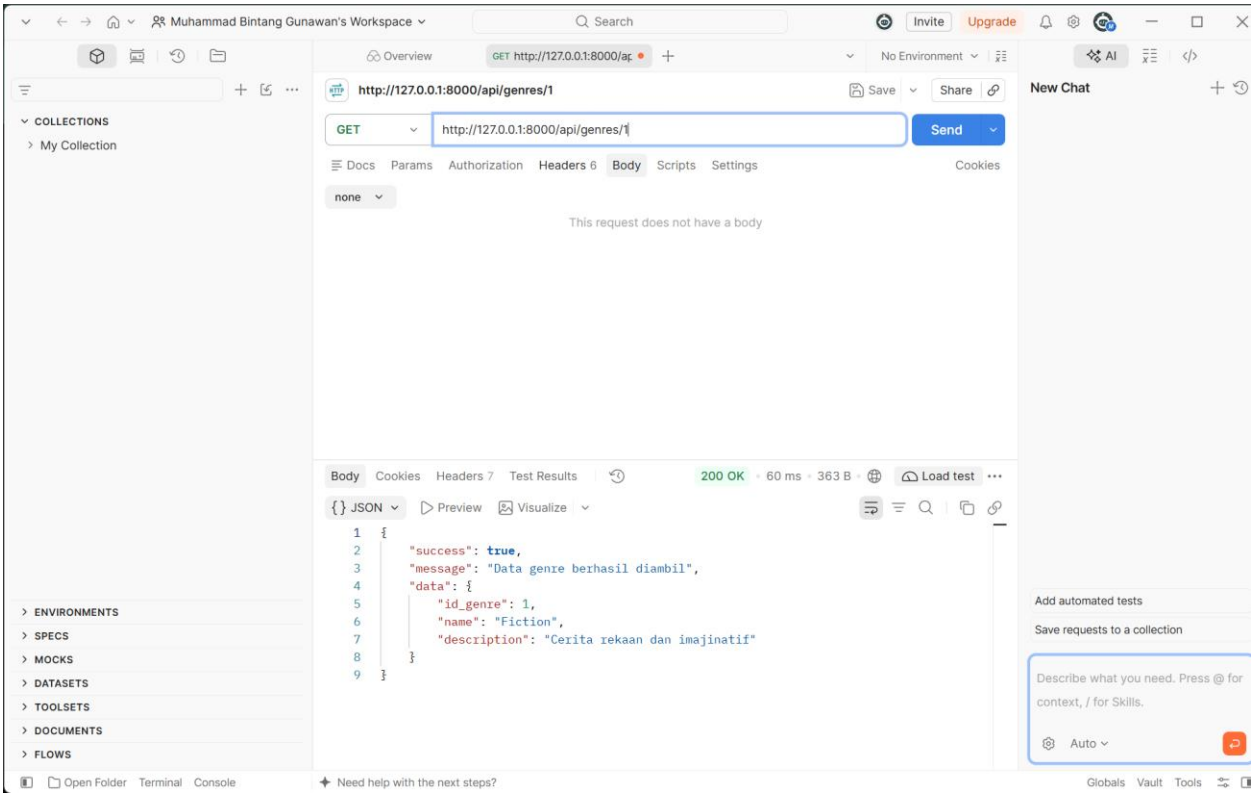

Untuk autentikasi berbasis token API, saya memakai Laravel Sanctum.

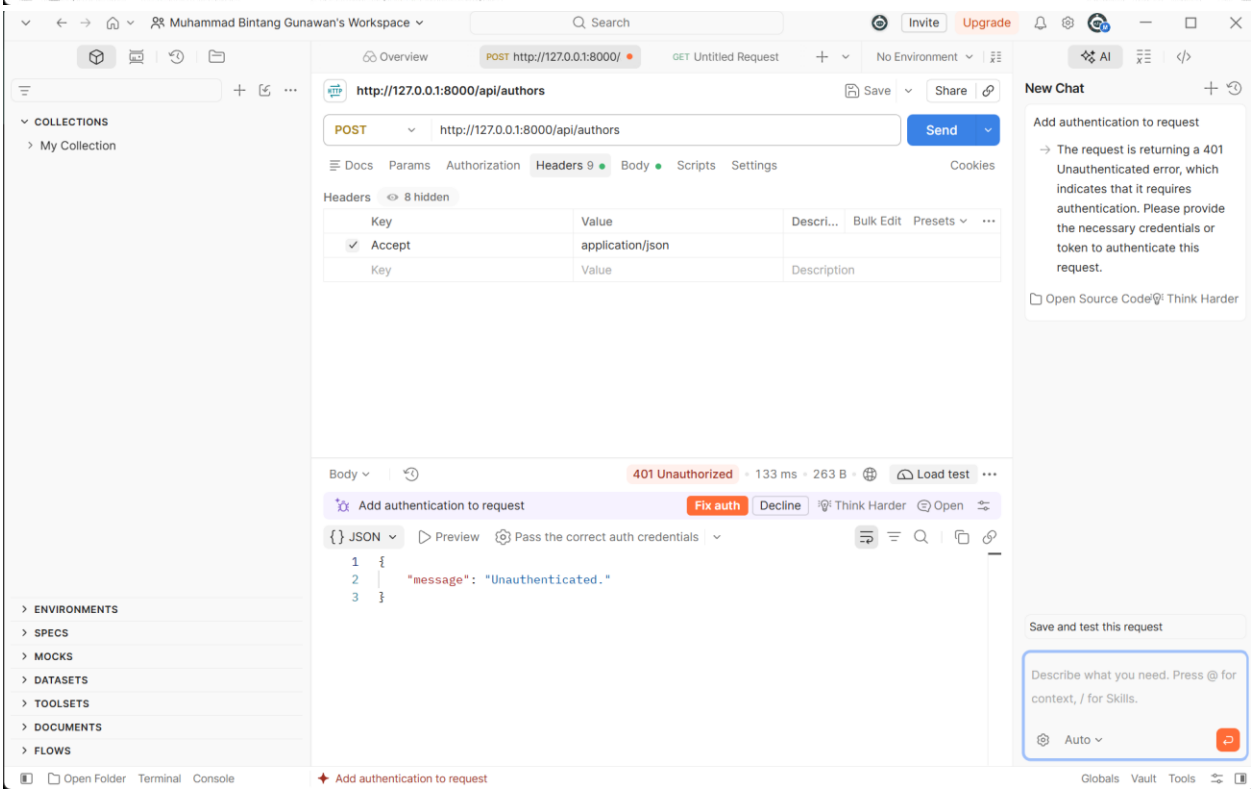

3.Hasil Pengujian/Screenshot
